## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 35-49, drawn to apparatus for electrically processing a workpiece with an auxiliary electrode, classified in class 204, subclass 228.1.
  - II. Claims 50-53, drawn to apparatus for electrically processing a workpiece with an exhaust gas conduit, classified in class 204, subclass 275.
  - III. Claims 54-56, drawn to a method for electrically processing a workpiece, classified in class 205, subclass 223.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a closed electrochemical processing vessel with no openings for release of exhaust gases. See MPEP § 806.05(d).

4. Inventions I and III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used in processes other than the process of the Group III claims. For example, the apparatus could be used in a process in which the auxiliary electrode is used to condition the process fluid.

5. Inventions II and III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used in processes other than the process of the Group III claims. For example, the apparatus could be used in a process in which exhaust gas is vented from the apparatus.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
